(347) 764-8594 [giorgigiorgobian54@gmail.com](mailto:giorgigiorgobian54@gmail.com) [Portfolio](#) [LinkedIn](#) [Github](#) NYC Area

**Skills** JavaScript, Node.js, Webpack, React.js, Redux.js, Ruby, Ruby on Rails, HTML5, CSS3, SCSS, Git, SQL, PostgreSQL, Jbuilder, jQuery, AWS S3, Stream API, Google Cloud Stk, Rspec, SQLite3,

## Projects

**Alexander** (JavaScript, React / Redux, Ruby / Rails, HTML, CSS, SCSS, PostgreSQL)

[Live Site](#) | [Github](#)

*Social Media Platform inspired by Instagram*

- Created custom animations, to improve static models using scss to improve user experience in terms of visualization.
- Implemented a search bar relying on Redux.js's front-end state and AJAX requests to custom back-end routes, which trigger controller methods to perform the necessary search on the back-end and deliver results efficiently.
- Constructed unidirectional data flow built on top of common Redux.js patterns to establish a normalized front-end state to act as a single source of truth for all React.js components to source accurate data as needed.
- Achieved the ability to upload images, utilizing amazon web services in conjunction with rails backend to enable users to have more robust experience by being able to securely upload images.

**Social Sentiment Analysis Vis** (JavaScript, D3.js, HTML5, CSS, Google Cloud STK, Natural Language API Stream API, Twitter API, Node.JS)

[Live Site](#) | [Github](#)

*App that analyzes tweets made in real-time and graphs results, determining positivity/negativity of trends.*

- Created user-friendly interface using d3.js with css and html to create one page app, that uses Twitter and Stream apis to pull live tweets and Google Natural Language api to analyze sentiment and render it through d3.js.
- Merged google api and twitter stream in the node.js backend inside of custom route for users to be able to get live tweets on demand, with custom query string.
- Constructed immersive chart, which describes positive and negative trends using d3.js to simplify output for seamless understanding, and better user experience.

## Experience

Black Rose Hospitality - **Beverage Director**

Jun 2018 - Jun 2019

- Crafted seasonal Cocktail menus, oriented on low production costs and high profit-margins.
- Changed existing products list and increased overall profit from alcohol sales by 14%, maintaining run costs under 14%.
- Organized and hosted events for celebrities, resulting in higher media traction for the venues.

Merchants Hospitality - **Bar Manager**

Dec 2017 - Jun 2018

- Launched the Venue and crafted the bar program, according to the demands of the market.
- Created price points that resulted in overall 21% percent run cost and averaged around 350-400% markup.
- Managed and trained staff, including scheduling, hiring, and giving classes about new products.

## Education

**App Academy**

2019

Immersive software development course with focus on full stack web development.

**SUNY Plattsburgh**

*Bachelor's in Business Administration*

Aug 2010 - May 2015
